

As it is possible to see on the map, a lot has changed in Bayview Harbor from 1980 to these days.

One of the first things that we can notice is that the amount of houses has increased dramatically. Meanwhile the part of the harbor related to the fish market has significantly reduced, as half of it was replaced by new houses and a shopping centre. Another big change was made to the area used for drying the fishing nets, as it was completely replaced by a parkland. Also the area dedicated to factories was halved in order to build a new housing area.

In regard to the harbor a lot has changed too. As it is noticeable a new lifting bridge was built and the mooring area has grown considerably. Also some changes were made to the marine transportation sailing in the harbor. In fact the previous truck ferries to northern France are now replaced by cruise ships headed to southern France and Spain.

Finally, it is possible to say that Bayview Harbor has particularly improved from different points of view by upgrading former structures, like the lifting bridge and the boat mooring, enlarging housing areas and building a parkland and a shopping centre.
